PROFESSIONAL SUMMARY

Full Stack Developer with ~2 years of professional experience building and deploying production web and mobile applications with React.js, React Native, TypeScript, Node.js, Express.js and MongoDB. Shipped platforms across healthcare, insurance, e-commerce and hospitality, including a WebRTC chat/audio/video consultation portal and insurance API integrations with Zuno, SBI General, ICICI Lombard and GoDigit. Strong in REST API design, JWT authentication, role-based admin panels, MongoDB schema design and cloud deployment.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React.js, React Native, React Hooks, Redux Toolkit, Context API, React Router, Bootstrap, Responsive Design, Figma-to-Code
Backend: Node.js, Express.js, REST API Design, JWT Authentication, WebRTC, Socket.IO, Third-Party & Payment Gateway Integration
Database: MongoDB, Mongoose, Schema Design, Aggregation Pipelines
Tools & Practices: Git, GitHub, Postman, VS Code, Cursor, npm, Vercel, Render, Hostinger, Agile, Code Review, Performance Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer | LYB Technology, Noida *Feb 2026 – Present*

- Own end-to-end features across React.js, TypeScript, Node.js, Express.js and MongoDB, from schema design to production deployment.
- Lead ongoing development of the Dr Dermat and Zanifest platforms, focused on WebRTC real-time communication and insurer API integrations.
- Design REST APIs with JWT authentication, role-based access control and structured error handling; improve performance via lazy loading, code splitting and query optimization.
- Manage deployments and environment configuration on Vercel, Render and Hostinger with Git-based release workflows.

Full Stack Developer | Aeron Digital Solution, Noida *Oct 2024 – Jan 2026*

- Built the Dr Dermat and Zanifest platforms from the ground up, plus multiple client products across healthcare, insurance, e-commerce and travel.
- Translated Figma designs into pixel-accurate responsive interfaces wired to REST APIs and third-party services.
- Collaborated with designers, backend engineers and QA in an Agile workflow; used AI-assisted tooling to accelerate delivery and code review.

KEY PROJECTS

Dr Dermat — Healthcare & Real-Time Consultation Platform (drdermat.com)

- Built a WebRTC one-to-one chat, audio and video consultation portal: signalling layer, peer connection lifecycle, offer/answer negotiation, ICE candidate exchange and media stream handling.
- Implemented full call state handling — ringing, accept, reject, end, mute, camera toggle — with reconnection and network-failure recovery.
- Developed the e-commerce module (catalogue, search/filters, cart, checkout, payments, order tracking) and the doctor/clinic portal covering onboarding, appointments, patient records and prescriptions.
- Implemented multi-profile account management, allowing a single user to create and switch between multiple family/patient profiles under one login.
- Built separate B2C and B2B authentication flows with role-based routing and dedicated dashboards for patients, doctors, clinics and business partners.
- Developed the companion Clinic App and User App in React Native, sharing the same REST APIs and authentication layer as the web platform.
- Created the role-based admin panel and MongoDB models for consultations, chat history, call logs and appointment linkage.

Zanifest — Insurance Aggregator Portal (zanifestinsurance.com)

- Integrated multiple insurer APIs including Zuno, SBI General, ICICI Lombard and GoDigit, covering quote generation, proposal submission, KYC, payment and policy issuance.
- Normalized varied insurer request/response formats into a unified data layer so quotes from all providers compare in one consistent interface.
- Handled auth tokens, retries, validation, failure scenarios and logging to keep the quote-to-policy journey stable across providers.
- Built policy management dashboards with search, filters, status tracking, renewals and downloadable policy documents, plus bulk policy upload with file validation, error reporting and batch processing.
- Built responsive React interfaces for quote comparison, multi-step proposal forms and payment confirmation screens.

RS Galaxy — Hotel Website & Booking System (Full Stack)

- Delivered the full site end to end: responsive SEO-friendly pages, booking and enquiry flow with availability handling and date selection, plus a secure admin dashboard for rooms, rates, bookings and enquiries.

Additional Projects

- Facebook Leadflow — lead capture, assignment, status tracking and admin panel. Jewellery E-Commerce — catalogue, cart, checkout and order management. Travel platforms — Tadoba National Park, Minisafar and Seven Safar listing, package and enquiry flows.

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA), RD Engineering College *2022*
Bachelor of Computer Applications (BCA), Hierank Business School *2019*
Certifications: Front End Developer — Ducat, Noida (2023–24) | React and Redux Certification (2024)
